Bhashyam E.M High School, Tanuku

July 2014 – June 2015

CGPA: 8.8 / 10

Skills

Frontend: HTML5, CSS3, JavaScript, React.js, React Hooks, Context API, Next.js, Bootstrap

Backend & Database: Node.js, Express.js, REST APIs, CRUD Operations, Django, SQLite

Tools: Git, GitHub, Unix

Experience

Full Stack Developer Intern (MERN)

Brainovision (Remote)

March 2024 – June 2024

- Built responsive UI components using React.js and integrated REST APIs, improving feature deployment efficiency by 30% through structured Git/GitHub workflows.

Software Engineering Virtual Internship

J.P. Morgan Chase & Co. — Forage (Remote)

July 2022 – August 2022

- Worked on financial data visualization tasks using JPMorgan Chase tools to analyze, display stock price data effectively.
- Built dashboards and optimized visualization workflows for better performance and efficiency.

Projects

Real-Time Chat Application | React.js, Node.js, Express.js, Socket.io, SQLite, JWT

April 2026 – May 2026

- Developed a full-stack real-time chat application supporting public chat rooms, private messaging, typing indicators, online presence, and read receipts.
- Implemented secure JWT-based authentication and authorization with protected REST APIs and Socket.io connection validation.
- Built real-time messaging features including message editing, deletion, notifications, and user status tracking.
- Designed and integrated a normalized SQLite database schema with pagination, edit history tracking, soft deletes, and optimized indexed queries for improved performance.
- Created a responsive frontend using React Context API for efficient global state management.

Nxt Trendz | React.js, JavaScript, REST APIs, JWT, Context API

April 2025 – May 2025

- Developed a responsive e-commerce platform with product listing, filtering, similar products, cart management features.
- Established secure JWT authentication with protected routes using React Router and cookie-based session handling.
- Managed global state using Context API to improve component communication and eliminate prop drilling.
- Integrated REST APIs using the Fetch API for dynamic content rendering and real-time cart updates.
